

Summer of Service 2023

Recommendation Form

For questions, please call 828-697-5777 or email pam@conservingcarolina.org
The completed form must be emailed to pam@conservingcarolina.org

Youth Applicant Name: _____ Grade Level: _____

School (if applicable): _____

Graduation Date (Anticipated or Actual): _____

Reference Contact Information

Your Full Name: _____

Email Address: _____

Work Phone: _____

Mobile Phone: _____

The best way and time of day to reach me is: _____

How long and in what capacity have you known the applicant? _____

After reviewing the attached Summer of Service Fact Sheet, please describe:

1. Why you think the applicant should be considered for an AmeriCorps Summer of Service position?
2. How do you feel this position may benefit the applicant in his or her personal and professional development?

Summer of Service

CHANGING LIVES THROUGH CONSERVATION AND SERVICE LEARNING

ABOUT CONSERVING CAROLINA'S SUMMER OF SERVICE PROGRAM

A project of Conserving Carolina's AmeriCorps Project Conserve, the Summer of Service program is gearing up for another cycle in 2023. Summer of Service is a young adult development initiative designed to engage 17-21 year olds interested in trying something new and learning more about one-self and the environmental fields of study and work. Participants work as a team to develop leadership, life, and work skills through hands-on service projects throughout the summer.

SERVICE PROGRAM DETAILS 2023

The program runs from June 19 - July 28, 2023. Participants will serve 18 hours per week - incorporating training and skills development activities in addition to direct outdoor service. Participants will commit to the completion of at least 100 hours of service and will receive a total of a \$1,600 stipend paid in three installments. Each participant who successfully completes their service term will also receive a \$357.08 education award that can be used to pursue higher education.

Summer of Service

CHANGING LIVES THROUGH CONSERVATION AND SERVICE LEARNING

Summer of Service Outcomes

In its pilot year, 2017, the Summer of Service program successfully engaged and immersed five high school-aged youth in 3,000 hours of service over the course of ten weeks. Crew members learned important work and life skills while improving local communities and public resources. During their service term, the crew improved habitat on over 20 acres and maintained over three miles of trails. Service activities were carried out at Pisgah National Forest, Florence Nature Preserve, Hickory Nut Gorge Teaching and Research Reserve, and other public and conserved properties.

@ , and after COVID, the Summer of Service program shifted to 100 service hours over a six week period; roughly 18 hours per week. Four high school and college-aged youth provided service throughout Henderson, Buncombe, Polk, Transylvania counties. During their term, the crew

create important native pollinator , removed litter from our rivers and streams, restored native habitat by removing non-native and invasive plants, and helped to build and improve local public hiking trails.

@ providing s gain important life skills and participate in a variety of team building exercises that strengthen relationships, trust, and create meaningful friendships.

"We worked hard all summer. We learned a lot of new stuff about the environment and about what we are capable of doing in our own community. I knew I liked nature and now I know I can do this for a living."

- Jordan, 2017 Summer of Service member

Conserving Carolina, formed by the 2017 merger of Carolina Mountain Land Conservancy and Pacolet Area Conservancy, has worked for over 30 years to protect and steward land and water resources vital to our natural heritage and quality of life and to foster appreciation and understanding of the natural world.

As the organization embarks on its next quarter century, it is committed to building on this foundation and to making its work relevant to an even broader cross-section of the communities where it works. The Summer of Service program is a key stepping stone on its path toward cultivating the next generation of conservationists in western North Carolina.
